Title

Altitude assay in Segre basin (Catalonia - Spain)

Citation Identifier Code

TM_{altitude_{assay}B3}

Identifier Code

Thematic Map: Altitude Assay. Basin: 3 (Segre)

Description

Experimental plots from the altitude assay are placed in San Miquel Land (Lleida) from Bodegas Torres and have an area of 124 ha at 850 m sea level. Demonstrative/productive plots have been designed to accommodate short cycle varieties to cool climates, where excessive temperature can reduce the quality of the grapes. The cultivated varieties are mainly Sauvignon Blanc, Riesling and Chardonnay (white) and Merlot and Pinot Noir (black), grafted on SO4 and R110 rootstocks, planted at 2.20 x 1 m.
