Identifier Code

Thematic Map: Spain National Forest Inventory Plots. Basin: 3 (Segre)

Description

This map locates the plots of the third National Forest Inventory of Spain (IFN3). The IFN is an extensive national database of forest surveys distributed systematically across the forested area of Spain. The IFN is based on a network of circular plots at a density of 1 plot per 200 ha, which allows forest characterization and includes exhaustive information on the structure and composition of canopy and understory woody species. The IFN3 was conducted from 1997 to 2008. The IFN3 plots have been used to analyse the changes in forest structure along the time through the comparison of forest inventories.
